

Symptoms of H1N1 (Swine flu)

Symptoms of swine flu are similar to regular human flu and include:

- Fever
- Cough
- Sore throat
- Body aches
- Headache
- Chills
- Fatigue

Some people also have reported diarrhea and vomiting associated with swine flu.

For people who have flu-like symptoms and have traveled to areas where swine flu has been confirmed, they should seek medical attention. However, if a person has flu-like symptoms but has not traveled to areas where swine flu has been confirmed, they should stay home and contact a doctor if symptoms are severe.
